

The first organically certified products in the UAE

Why go Organic?

Certification Assurance

Organic Certification complies with the worldwide demand for organic products. It is intended to protect consumers as part of the "Consumers Rights Law". The certification is done to assure the consumer that what they are purchasing or consuming have undergone stringest testing.

Organic Food, Pure and Simple!

Organic farming is associated with non-use of artificial chemical pesticides, herbicides and fertilizers, helping to keep toxins out of air, water and soil.

Organic Production reduces health risks

Organic food is much richer in vitamins, minerals and fibre and retains the levels of nutrients for much longer. Your body will be more resistant to disease as it will have higher levels of the essential nutrients it needs to fight off infection. And you will definitely have more energy through consuming lower levels of toxins and chemicals that slow your body down.

Organic farmers do it as nature intended

Organic agriculturalist value the balance demanded of a healthy Ecosystem, Organic farming works in harmony with nature rather than against it. This involves using techniques to achieve good crop yields without harming the natural environment or the people who live and work in it.

Organic is Modern

Organic farming does not mean going 'back' to traditional methods. Many of the farming methods used in the past are still useful today. Organic farming takes the best of these and combines them with modern scientific knowledge.

Our Organic Mazaraa

Mazaraa being the first certified organic farming in the UAE, is proud to bring to the markets locally produced vegetables, fruits, honey, dairy products, meat, poultry and fish. All produced to the highest standards of quality, assured by the certification proudly received from ICEA. Our store carry a vast range of organic consumer products available for your better health and convenience.

Organic In and Out

At Mazaraa we believe that organic is a way of living, this is why we made sure that not only to offer organic goods, but also the surrounding and the lifestyle must be organic. And this can be merely seen in our store structure as it is made from 100% eco-friendly building material, in addition to using recycled, degradable and environment friendly material from display to packaging.
